

DAILY TORIC CONTACT LENS STUDY (CAT)

Why we are doing this study:

To evaluate the safety and effectiveness of two daily disposable soft contact lenses for astigmatism.

Who can be in the study?

Eligibility Criteria:

- Ages 18 and older
- Presently wearing soft contact lenses for astigmatism
- Note: This study will be enrolling approximately 50% Chinese subjects (defined as all four grandparents being born in China).

Further screening questions will be asked prior to scheduling an appointment.

What the study involves:

This study will ask subjects to wear one of two different daily disposable soft contact lenses for astigmatism for three months. The subjects will be required to attend 5 study visits over the course of up to 18 weeks.

Will you directly benefit from the study?

Participation in this study does not directly benefit subjects.

Other things you should know about the study:

Subjects may be compensated up to \$210 for participation in the study.
