

Contact Lens Comfort Study (CV-21-67)

Why is this study being conducted?

CooperVision, Inc, is evaluating the comfort of an investigational daily disposable soft contact lens.

Who can be in the study?

You may be eligible to participate if:

- Healthy males and females between the ages of 18 and 45
- Currently contact lens wear at least 3 days/week and at least 6 hrs/day
- Experience end of day dryness with current CL wear

Further screening questions will be asked prior to scheduling an appointment.

What does participating in the study involve?

If you qualify and choose to join the study, you will receive all study-related contact lenses at no charge. There will be 5 planned visits within a 3 day period. There will be 2 visits within first day and 2 visits within a second day and an exit visit the third day.

Who can I contact for more information?

Principal investigator is Melissa Lee-Kung OD, MS, FAAO

For more information, please contact us by: phone: (212) 938-4052, or by email: clinicresearch@sunyopt.edu and someone from the clinical research department will get back to you.
