Cornea & Contact Lens Residency at SUNY
Supervisor: D. Libassi, OD Email: dlibassi@sunyopt.edu
Position available: 1
Mission Statement
The Cornea and Contact Lens residency, sponsored by the State University of New York State College of Optometry, provides qualified optometrists with advanced clinical education in contact lens patient care. The program will provide four main components: a clinical patient care component, a didactic component that provides advanced knowledge in contact lens care, a teaching component that allows for the acquisition of clinical and classroom educator skills; and research / scholarly activity portion. The resident is scheduled for direct patient care in the areas of anterior segment and specialty contact lenses. Upon completion of the program the resident will be qualified to provide high level patient care in the areas of contact lenses, corneal disease management, and pre / post corneal surgery. It is expected that the graduating resident should be clinically prepared to engage in collaborative contact lens research, conduct related scholarly activities, and function as an optometric educator in this field.

Community Health Optometry/Ocular Disease Residency at NYC Health + Hospitals / Gotham Health East New York and SUNY
Supervisor: L. Hashkes, OD Email: lhashkes@sunyopt.edu
Position available: 1
Mission Statement
The residency in Community Health/Ocular Disease Optometry seeks to attract highly qualified optometric graduates who have demonstrated above average entry-level competence in full-scope optometric care and have an interest in community-based practice in an urban locale. This program provides the opportunity for the resident to render continuity of care for patients with a diverse range of eye and vision disorders. Individuals who complete the program will be prepared to develop and operate a full-scope optometric service in an inner city environment, and have the ability to assume a faculty position at an optometric educational institution.

Low Vision Rehabilitation Residency at SUNY
Supervisor: R. Marinoff, OD Email: marinoff@sunyopt.edu
Position available: 1
Mission Statement
The Residency in Low Vision Rehabilitation will provide the resident with advanced and concentrated clinical and didactic experience in all aspects of Low Vision Rehabilitation. The resident will be involved in both coordination and consultation of patient care with other rehabilitation, medical, and social services. Individuals who complete the program are expected to be able to deliver a high level of clinical care, serve as teachers in optometric institutions, and serve in a leadership role in optometric and service agencies and organizations involved in low vision care.

Ocular Disease Residency at Fromer Eye Centers
Supervisors: M. Su, OD & J. Nguyen, OD
Emails: msu@fromereye.com  jnguyen@fromereye.com
Position available: 2
Mission Statement
The mission of the Residency in Ocular Disease at Fromer Eye Centers is to offer qualified optometrists advanced clinical training and education in the diagnosis and treatment of ocular disease in a private practice environment. The program will prepare the resident to work confidently and efficiently as part of a dynamic team of professionals including ophthalmologists, optometrists, ophthalmic technicians, opticians and administrative personnel.

Ocular Disease Residency at SUNY
Supervisor: S. Bass, OD Email: sbass@sunyopt.edu
Positions available: 4
Mission Statement
The mission of the Residency in Ocular Disease, sponsored by the State University of New York, College of Optometry, is to offer qualified optometrists advanced training, education and research opportunities in the diagnosis and treatment of ocular disease and to prepare the resident to become a clinical and research scholar. The program has four parts: 1) a patient care component that assures sufficient numbers of encounters and diversity of conditions in a variety of clinical settings both within the College and at external sites, including a hospital setting 2) a didactic component that provides advanced knowledge in ocular disease 3) a pedagogic component that allows for the acquisition of clinical and classroom teaching skills and 4) a research/scholarly activity portion. The resident participates in patient care in one of the College’s clinical units, on a limited and elective basis. Upon completion of the program, the resident will be qualified to provide high level diagnosis and independent or co-management of ocular diseases in private or institutional settings, engage in scholarly activities, and function as an optometric educator in this field.

SUNY College of Optometry has been conducting year-long optometric residencies since 1974, when the in-house Vision SUNY, College of Optometry has been conducting year-long residency program in the country and the third to receive accreditation status. Since that time, the College has expanded to include 19 programs. The residencies are clinically based, patient care oriented programs. Along with the clinical component there are formal didactic activities which are an integral part of the residency program. All residency programs have the common goal of developing unique skills and competencies in one or more areas of optometric practice. Each program provides a body of knowledge that goes beyond that which is effectively covered in the professional optometric (O.D.) program.

Optometry profession. (Military selection not through ORMatch) of didactic and scholarly activities to prepare residents for leadership roles within the
Army Optometrists in the diagnosis, treatment and vision rehabilitation of patients with
advanced levels of care in group health settings, serve as educators in optometric
teaching, and the opportunity for scholarly activity. The residency covers the breadth
of a middle-aged to elderly population of veterans. Each resident will divide his/
her time between a primary care facility (St. Albans campus) and an acute care facility (Brooklyn campus). Each resident will be expected to diagnose and provide basic care in all aspects of optometry and advanced care in ocular diseases. Optometry residents are expected to have a significant emphasis on glaucoma. The resident will act as a full member of the health care team with the ability to utilize all hospital resources and services. Residents will be prepared to assume academic/teaching responsibilities as part of their function in a health care service environment.

Residency at Womack Army Medical Center

Vision Rehabilitation (Brain Injury Rehabilitation) Optometry Residency at SUNY
Supervisor: M. Vricella, OD Email: mvricella@sunyopt.edu
Positions available: 4 (plus 1 Without Compensation)

Vision Therapy & Rehabilitation Residency at Eye Care Associates
Supervisor: R. Schulman, OD Email: drmrdyschulman@gmail.com
Position available: 1

The mission of EyeCare Associate's residency in Vision Therapy and Rehabilitation is to expand awareness, accessibility and advanced competence in the areas of vision therapy and rehabilitation in a private practice setting. The program provides opportunities in vision therapy and pediatric optometric care; psychophysical testing and enhancement and sports vision; with patient encounters including contact lens and ocular disease through a residency program.

Vision Rehabilitation (Brain Injury Rehabilitation) Optometry Residency at SUNY
Supervisor: M.H.E. Han, OD Email: mh@sunyopt.edu
Position available: 1

The mission of the Vision Rehabilitation in Brain Injury (Brain Injury Emphasis) provides advanced clinical training in the diagnosis, treatment and vision rehabilitation of patients with acquired brain injury (ABI) that result from trauma, cerebral vascular accident, tumor, aneurysm, and post-surgical complications. The program provides the graduate completing the program with the tools to thrive in areas of patient care, vision rehabilitation and leadership within hospital-based as well as private clinical settings.

The Residency in Pediatric Optometry provides advanced levels of clinical skills, teaching, and the opportunity for scholarly activity. The residency covers the breadth of primary and secondary pediatric vision care. Residents of the program will deliver advanced levels of care in group health settings, serve as educators in optometric or related health institutions, and conduct clinical scholarly activity with the goal of professional leadership and social change in pediatric vision care for Optometry and in the greater community.
